

Special Medical Presentation

Can a woman change her decision after taking the abortion pill?

Dr. Matthew Harrison, M.D.

Tuesday, May 21, 7 pm

**Saint Mark Catholic Church
Kerin Family Center Parish Hall
14740 Stumptown Road, Huntersville, NC**

Dr. Matthew Harrison has served as Hospitalist Director of Novant Health Rowan Regional Medical Center in Salisbury, and specializes in family medicine with a concentration in obstetrics.

He serves as a medical advisor for Priests for Life, and as medical director for Belmont Abbey College's health clinic and HELP Crisis Pregnancy Prenatal Clinic.

He is also an Assistant Professor at Campbell School of Osteopathic Medicine and is Assistant Director of Abortion Reversal Protocol.

Learn how local pro-life doctor Matthew Harrison developed a way for women to reverse a chemical abortion before it is too late.

He will be here to talk about the RU 486 Abortion Pill Reversal Kit he helped to invent.

If a woman takes the abortion pill RU 486, she has a window of time to change her decision and reverse the effects to save the baby.

Learn more about this important topic and how it was invented. *Refreshments to be served.*

This event is co-sponsored with C-PLAN of Charlotte. For more information contact Mike FitzGerald, the Saint Mark Respect Life Ministry, respect.life@stmarknc.org
